American Honda Motor Co., Inc., reserves the right to make changes at any time, without notice or obligation, in colors, specifications, accessories, materials and models.

**Manufacturing**

The Odyssey is produced exclusively at Honda Manufacturing of Alabama (HMA) using domestic and globally sourced parts. The Lincoln, Alabama, plant conducts synchronous production of vehicles and engines and is the exclusive global producer of Odyssey minivans, Pilot sport utility vehicles and Ridgeline pickup trucks. In a further demonstration of Honda's manufacturing flexibility, the plant began production of Accord V-6 Sedans in July 2009, enabling the Marysville Auto Plant in Ohio to become the sole source for production of 4-cylinder Accords (Sedan and Coupe) sold in North America. The HMA plant was also the first automobile plant in North America to operate as a zero-waste-to-landfill facility, leading the way for reduced waste from vehicle production activities at all of Honda's plants in North America. The plant started production with the Odyssey minivan in 2001, adding a second production line and assembly of Pilot SUVs in 2004. Production of Ridgeline trucks was added in February 2009, followed by the addition of Accord V-6 Sedan production in July 2009.
